Mid-Term Program Assessment of the Sikat Saka Program (SSP)

Dr. Fezoil Luz C. Decena Lead Consultant, ASPSI Final Report ACPC

Outline of Presentation

- Introduction, Objectives, Framework, and Methodology
- Results and Discussion
 - Performance Evaluation

 \clubsuit Process of SSP implementation in the field

SSP reach

Impact Evaluation: Survey Results

Profile (farmer and farm)

Credit information – access, utilization, repayment, problems

Impact - partial budget and PSM

Perception of respondents on SSP (by institution)

• Conclusions and Recommendations

Introduction

- one of the six programs under Agro-Industry Modernization Credit and Financing Program (AMCFP)
- Iaunched in 2012 with the goal to (a) help more palay farmers access timely, adequate and affordable production credit, and (b) improve the viability of agricultural production by ensuring availability of irrigation services, extension, links to markets and providing a favorable economic environment
- integrated financing program jointly implemented by
 DA, ACPC, ATI, NIA, NFA
 LBP, PCIC

Objectives

General: to determine the program accomplishments vis-a-vis its component targets/objectives.

Specific :

- 1. Evaluate to what extent the SSP had contributed to (a) increasing agricultural productivity and income; (b) rice self-sufficiency objectives; and (c) improving the quality of life (e.g., living conditions, access to basic services, among others) of small rice and corn farming households;
- 2. Determine if access to formal credit of small palay and corn farming households has improved as a result of the SSP in terms of outreach, that is, **the amount of loans granted** and the **number of farmer borrowers** (including new borrowers), as well as **funds leveraging**, and **compliance with the agreed lending terms and conditions** such as *interest rate, eligibility criteria, documentary requirements, status of service conduits, and repayment performance*, among others;

Objectives

3. Evaluate to what extent the NFA and/or other reliable buyers have absorbed produce of palay and corn of farmer-borrowers;

- Determine the extent to which the ATI has complied with the requirements of the program and its contribution to increasing the credit worthiness and discipline of farmer-borrowers;
- Determine the extent to which the conduits (including service conduits) have complied with the program's lending terms and conditions;
- Identify successful features/aspects of the SSP and operational bottlenecks and problems; and
- 7. Provide **recommendations** on how to further strengthen the delivery of credit services to small farmer households.

Framework

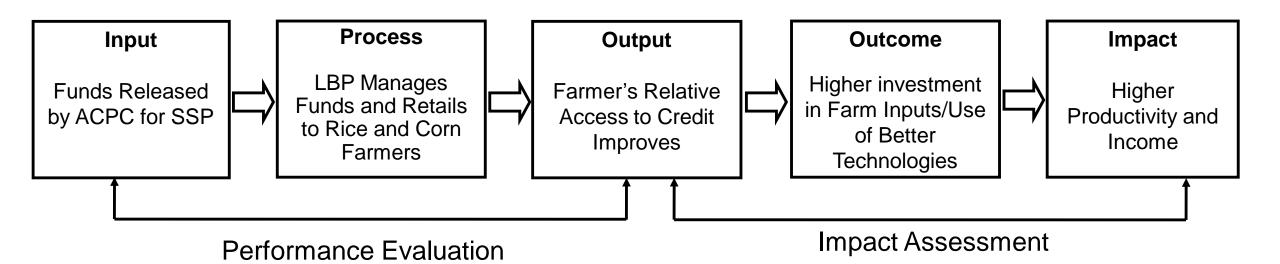

Figure 1. Performance evaluation and impact assessment

Framework Q TP_1 **TP**₀ X **X**₀

Figure 2. Shift in total product curve due to intervention

METHODOLOGY

www.hotdw.com

Survey Areas and Sample Size

| Province | Number of Beneficiaries | Municipalities | Municipalities Number of Samples (with FGD) | | Total |
|-----------------------|----------------------------|---|--|----------|-------|
| | beneficiaries | | Bene | Non-Bene | |
| Isabela | 2,265 | Alica, Santiago , San Pablo | 96 | 96 | 192 |
| Nueva Ecija | 1,788 | Guimba , San Antonio, Gen. Natividad | 95 | 95 | 190 |
| Occidental Mindoro | 1,001 | Rizal , Calintaan, Sta Cruz | 92 | 92 | 184 |
| Bukidnon | 377 | Valencia, Malaybalay , Quezon | 93 | 93 | 186 |
| Bohol | 517 | Pilar , Ubay, San Miguel | 86 | 86 | 172 |
| lloilo | 194 | Oton , Banate, Barotac Viejo | 65 | 65 | 130 |
| Total | 7,044 | | 527 | 527 | 1084 |

- Identified the top 6 provinces (already covers 50% of bene) as of April 2017 based on LBP database
- Slovin's Formula with 10% margin of error to determine number of beneficiaries (and equivalent number of nonbeneficiaries
- Top three municipalities
 with highest number of
 borrowers

Key Informant Interviews

- LBP Headquarters and Lending Center
- ACPC
- NIA Offices (Regions)
- NFA (Regions) and Bohol Rice Processing Center
- ATI (Regions)
- Irrigators Associations in selected municipalities covered
- PCIC

Analytical Procedures

Performance Evaluation

- Documentation and Analysis of the inputs
- Performance Parameters
- Efficiency of partner banks/conduits
- Descriptive Statistics

Impact Assessment

- Partial Budget Analysis
- Propensity Score Matching
 - Probability Logistical (Probit) Model
 - Average Treatement Effect of the Treated

RESULTS AND DISCUSSION

www.hotdw.com

A. PROGRAM IMPLEMENTATION ANALYSIS

Table 4. Process of Sikat Saka Program loan application and release

| Responsible Entity | Process | Requirement |
|---------------------------|---|---|
| | A. Endorsement | |
| Irrigators Association | Pre-screens and consolidates (at least 40) farmer-members based on eligibility requirement | Should be member of IA Not a member of any cooperative No previous loan for the last 6 months with LBP owns 0.50 to 5.0 ha with clean title |
| | | |
| Farmer | Applies loan, secures and prepares requirements | purchase order from NFA, NABCOR or other reliable buyer attend briefing and/or seminar conducted by ATI collateral requirement: title of land, certification, OR/CR of motor vehicle farm plan and budget |
| | | |
| Irrigators Association | checks completeness of submissions of farmers and prepares additional requirements | certification of no previous loan from LBP summary of farmers availing loan containing information on name of farmers, address, title number (TCT/ OCT/ CLOA), location of farm, amount of loan being applied Management Takeover Agreement |
| | | |

Table 4. Continued...

| Responsible Entity | Process | Requirement |
|---------------------------------------|---|--|
| National Irrigation Administration | Endorses participating IA to LBP | |
| | | |
| | B. Loan Processing, Packaging and Administration | |
| Land Bank of the Phils | Account officers process the loan application in accordance with existing guidelines of LBP Safekeep land titles and return the same upon full payment Facilitate farmers' opening of deposit account with LBP branch and execute an auto-debit arrangement with LBP for payment of loan File AGFP guarantee application and claims in cases of past due loans | Use of a simplified loan application form Loan amount is based on the farm plan and budget but not to exceed loan ceiling of P41,000/ha for inbred and P50,000/ha for hybrids Interest rate is 15% per year for the first 2 cycles, reduced by 1% per year for every succeeding cycle on loans fully paid up to the 8th cycle |
| | | |
| | C. Loan Approval and Release | |
| Land Bank of the Phils | Approves of loans by designated approving authorities Releases loan to farmers through ATM accounts Provides NFA/NABCOR list of releases which will serve as basis to pay to farmers for palay purchases | Collateral for safekeeping Management Takeover Agreement |

Table 5. Sikat Saka Program Implementation on the Ground

| Provision | Practice on the Ground | Province |
|---------------------------------|---|---|
| Size of farm and amount of loan | Loan ceiling of 80% of farm budget plan, not to exceed P41,000/ha for inbred and P50,000/ha for hybrid Size of farm is 0.5 to 5.0 ha | All surveyed provinces |
| Momborship to IA | Farmers who are members of more than one IA may borrow according to the number of their membership to IA | Nueva Ecija |
| Membership to IA | Farmers with multiple IA membership is eligible only once Farmers of good standing is defined as those who pay their ISF | All surveyed provinces except Nueva Ecija |
| No existing loan from LBP | Still are allowed to borrow provided they have capacity to pay | Nueva Ecija |
| Attendance to Seminar | One day seminar on credit worthiness, and briefing of the SSP; organized by ATI Borrower attends trainings only once | All surveyed provinces |
| | Seminars on rice production with resource speakers from DA and LGU Agricultural Office | Occidental Mindoro Bohol, Bukidnon |
| | P.O. from NFA is issued only once, and may be reused for succeeding loan application as long the amount remains the same | Nueva Ecija |
| Purchase order | P.O. is issued every time a loan application is made; only farmers who bring in a certain percentage of their harvest from loan period can be issued another PO for another loan; uses passbook | Bukidnon (1%) Occidental Mindoro (70%) |
| | NFA requires LBP receipt as proof that borrowers have no more accountability before issuing another PO Summary of farmers availing loans (from IA) | Occidental Mindoro |

Table 5. Continued...

| Provision | Practice on the Ground | Province |
|---------------------------------|--|---------------------------------------|
| | NFA needs endorsement of IA indicating some information to ensure capacity to pay based on projected harvest | All Provinces |
| Purchase order | PO issued by the Bohol Rice Processing Center and not by NFA. BRPC executes a Production, Technical and Marketing Agreement with the IA, farmer borrowers, LBP, NIA and DA | Bohol |
| | PO issued upon endorsement of NIA, returned to NIA for onward submission to LBP | lloilo, Nueva Ecija, Isabela |
| Loan Security and Collateral | Promisory note and management takeover agreement (notarized) Certificate of land title Certificate of registration and official receipt of motor vehicle Certification from land owner (for tenants) Certificate of mortgage | All surveyed provinces |
| | - Animal registration | Occidental Mindoro Bohol, Bukidnon |
| | - Certificate of ownership of appliances | Bukidnon |
| Interest rate | 15%/annum or 7.5%/season; declining at 1%/season until 9th season where interest is only 8% | All surveyed provinces |
| Incentives to IA | - 0.5% for 100% repayment rate and 0.25% for 90 – 99% repayment rate | All surveyed provinces |
| NIA | identifies IAs of good standing issues certificate that IA is of good standing issues certificate of water availability | All provinces |

Assists in identifying

farmer-borrowers

- Assists in

requirements from

NIA, NFA

- Consolidates and

endorses loans

- Monitors payment

- Implements MTA

(Mindoro)

LBP:

- Nueva Ecija – has a separate unit for SSP - Different collaterals – some still use animal registration, use of appliance (Bukidnon), ownership of land (Bohol)

No uniform practice Uses 3 criteria in determining IA for endorsement to LBP:

> - IA should be in good standing (ISF)

> > - Farmer-borrower has no outstanding loan with LBP

- Water availability

or process followed in issuance and use of PO

- Not all PO's are used (for disposal of harvest or for payment of loan)

Best Practices: IA

Selection of borrowers

 Uses criteria in selection of borrowers outstanding farmers

Processing of documents

- Hire coordinators
- Pay IA member for processing

Loan Payment

Monitoring

- Payment is a shared responsibility
- Discussed in meetings

Implementation of MTA

- first offered to relatives
- IA president takes over

Best Practices: Other agencies

NIA

- Selection criteria based on outstanding IA (Bukidnon)
- Offers assistance in paper work

NFA

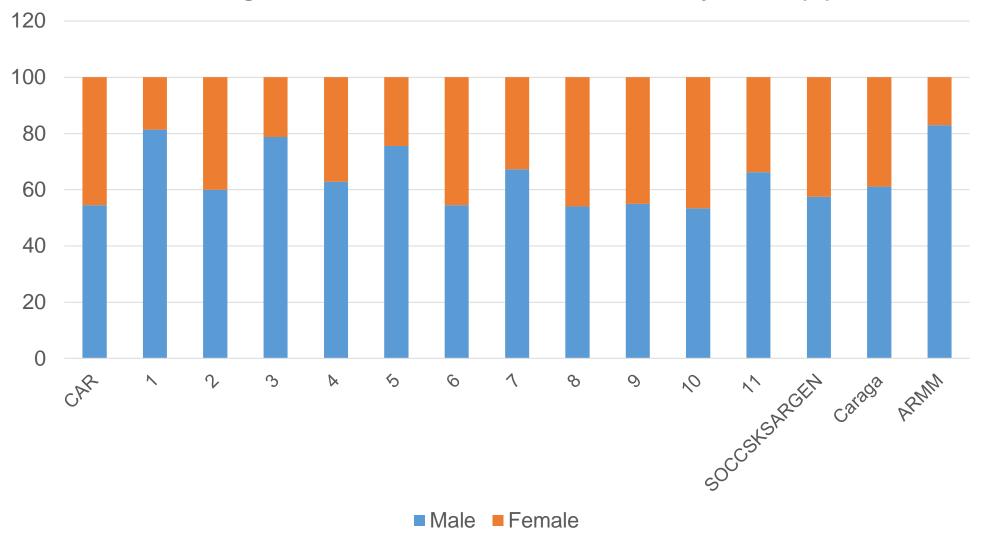

- Requires farmers to bring 10% (Bukidnon) to70% (Mindoro) of their harvest before another PO is issues
- PO is issued by reliable trader (Bohol RPC)

LBP

- Ensures bank procedures are followed
- Innovates on treatment of bank collateral (Bukidnon)
- Separate unit for SSP (N. Ecija)

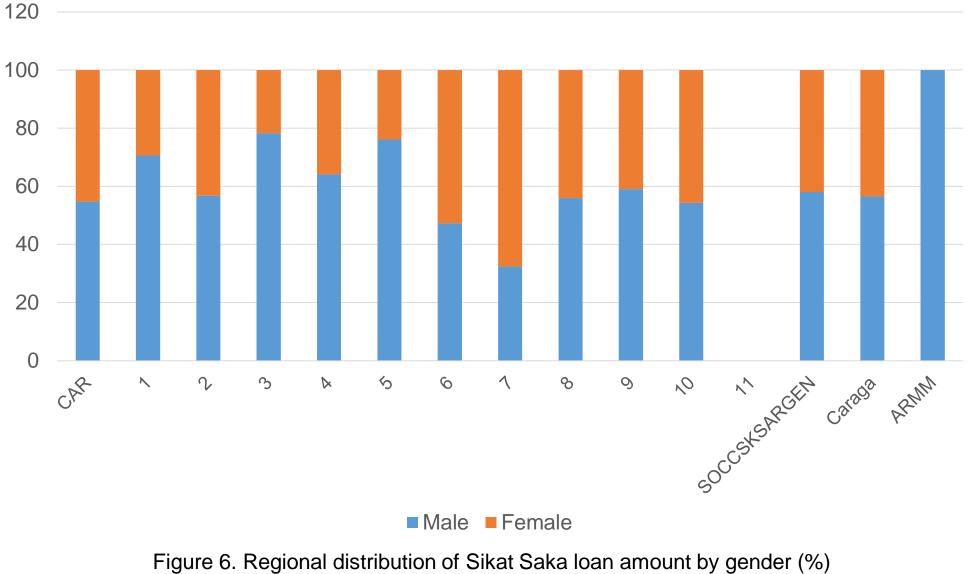

Table 11. Loan amount, number of borrowers, area coverage of SSP as of April 2017

| Region | Q12017 Loan Amount (M ₱)* | Cumulative Loan Amount (M ₱)* | Number of Borrowers* | SSP area for 2017 Loan ha)* | Total Irrigated Area (ha)** | % of irrigated area covered by SSP |

| With and Without SSP | 284 | 3,127 | | |

Impact of SSP Participation on Farm Net Income: Propensity Score Matching Method

1. Determinants of Sikat Saka Participation (Probit Model)

SSP = f (Edu, FO, Hhsize, Fsize, Tenure, Location)

where:

Edu = educational level attained by farmers
FO = membership in organizations other than the irrigator's association (member =1, 0 otherwise)
HHsize = number of persons living together in one household
FSize = area devoted to rice farming (in hectares)
Tenure = tenure status of the farmer (1 = owned, 0 otherwise)
Location = province

| Table 26. Probit model estimating the | he probability of participating in the |
|---------------------------------------|--|
| Sikat Saka Program | |

| | Coefficient | Standard Error |
|-----------------------------------|-------------|-------------------|
| Membership in other organizations | 0.663*** | 0.103 |
| Household size | 0.038* | 0.023 |
| Farm size | 0.235*** | 0.0306 |
| Education | 0.064*** | 0.240 |
| Tenure status | -0.2069** | 0.068 |
| Location | 0.139*** | 0.025 |
| | | |
| Pseudo R2 | 0.09 | |
| Log likelihood function | -656.56 | |
| Prob > chi-square | 0.000 | |
| LR chi-square | 142.46 | |

***,* means significant at 1% and 5% probability level, respectively

Impact on Net Income

Table 27. Impact of the SSP on the Net Farm Income (or Average Treatment Effect of the Treated) using the Nearest Neighbor Matching Method

| Outcome: Incremental Net Income | ATT (P/ha) | Number of Treated | Number of Untreated | t-value |
|---------------------------------------|------------------------|----------------------|------------------------|---------|
| Dry Season | 6,259.84** | 523 | 228 | 2.29 |
| Wet Season | 4,209.74 ^{ns} | 523 | 247 | 1.18 |

** significant at 5% level; ns = not significant

Improvement in Well-being Using Qualitative Indicators

Table 28. Borrowers' reasons for availing loans and satisfaction with the SSP

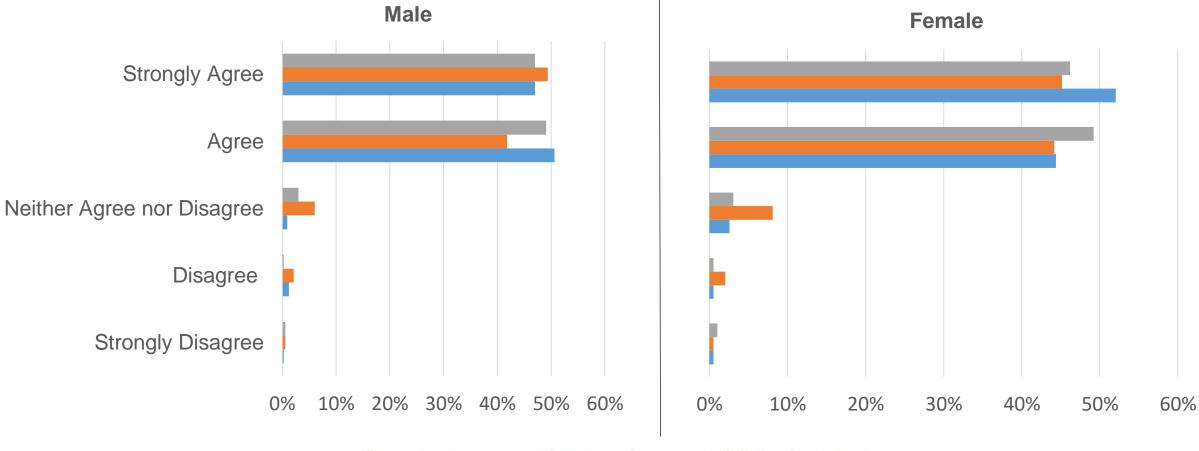

| ltem | All (n=527) | Male (n=330) | Female (n=197) |
|---|----------------|-----------------|-------------------|
| Reasons for Choosing Sikat Saka Program | | - | |
| Low interest rate | 83 | 15 | 31 |
| Source of capital for rice farming | 15 | 9 | 6 |
| Ease in availment procedures | 12 | 8 | 4 |
| Fast loan release | 8 | 5 | 3 |
| Satisfied with the program | | | |
| Yes | 98 | 61 | 37 |
| No | 2 | 2 | 1 |
| Reasons for Satisfaction | | | |
| Low interest | 32 | 22 | 10 |
| Easy to avail | 6 | 5 | 2 |
| Major source of capital | 12 | 11 | 1 |
| Better quality of life | 30 | 18 | 12 |

Table 29. Perceived improvement in the quality of well-being of borrowers due to loans from the Sikat Saka Program

| | All (n=527) | Male (n=330) | Female (n=197) |
|---|----------------|-----------------|-------------------|
| Perceived improvement in the quality of life | | | |
| Better quality of life | 30 | 21 | 10 |
| No longer source loans with high interest | 12 | 7 | 6 |
| Higher income | 9 | 6 | 3 |
| Sustain the education of children | 8 | 4 | 3 |
| Home construction | 5 | 3 | 2 |
| Able to buy vehicle/farm machines & equipment | 6 | 4 | 2 |
| None | 6 | 4 | 3 |
| How SSP helped farmer in rice farming | | | |
| Improved knowledge in rice farming through attendance | | | |
| to trainings and seminars | 68 | 42 | 27 |
| Proper utilization of loan and budgeting | 8 | 5 | 2 |
| Sufficient capital to buy farm inputs | 9 | 6 | 3 |
| Updated technology | 1 | 1 | - |

Perception about SSP

Borrower Perception on the Role of NIA in SSP

It is easy to get certification of water availability from NIA.

- NIA provided water for the whole cropping season
- NIA effectively assists faremrs in loan application

Figure 19. SSP borrower's perception on the role of NIA

Borrower Perception on the Role of ATI in SSP

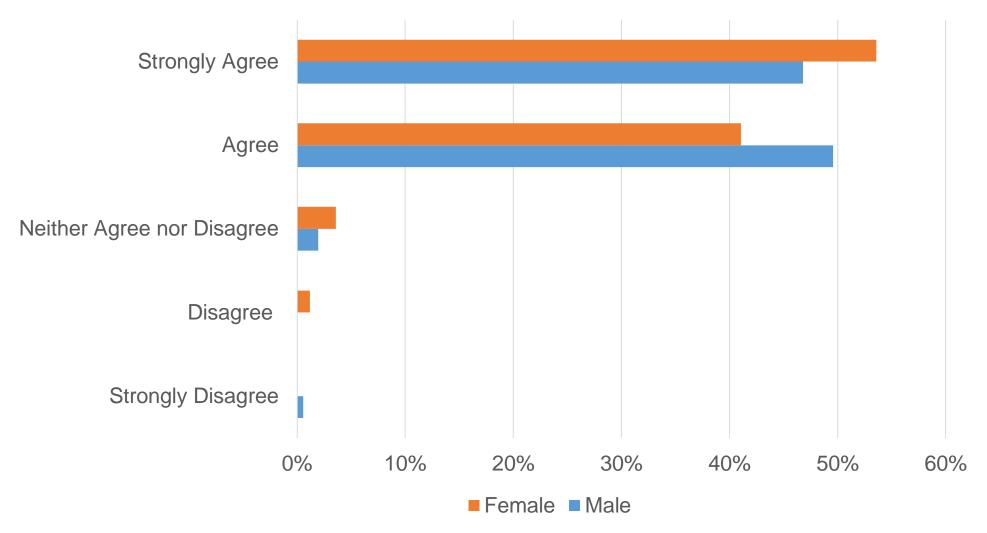

Figure 20. SSP borrower's perception on the effectiveness of the trainings/seminars provided by ATI

Borrower Perception of the role of NFA in SSP

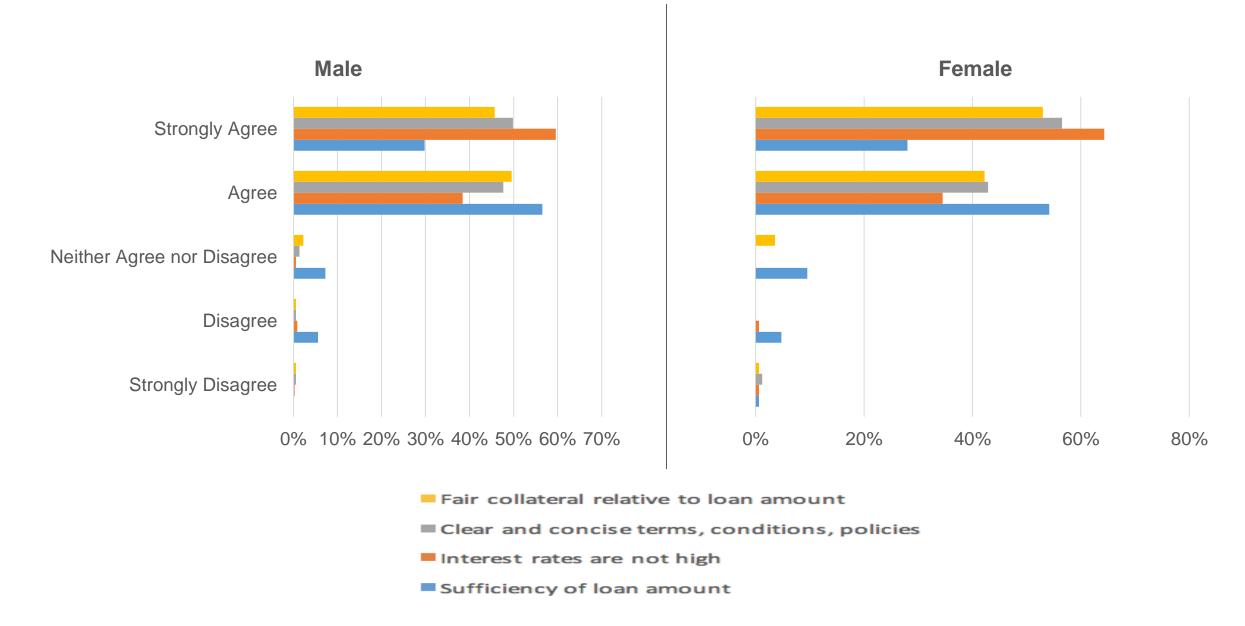

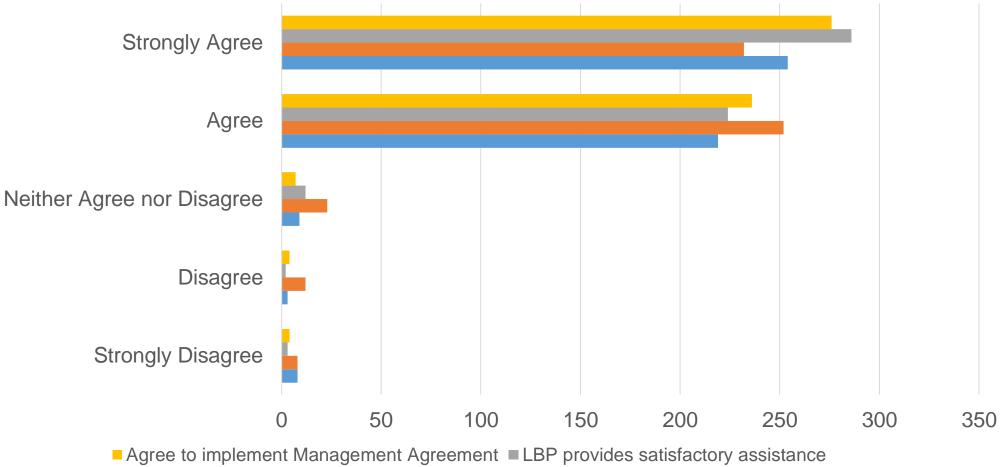

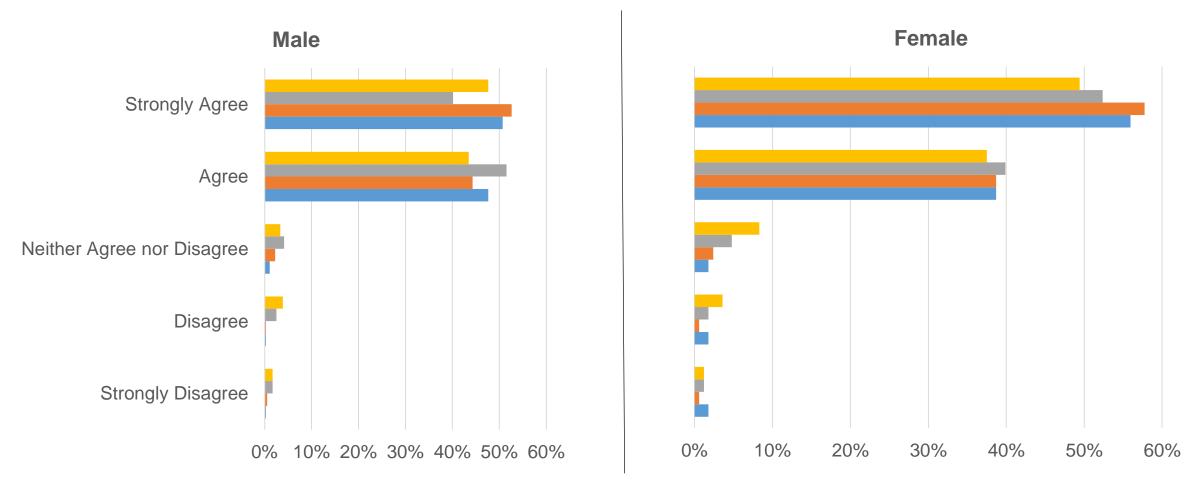

Figure 20. SSP Borrowers' Perception on the Loan Features

SSP Borrower Perception of Loan Implementation by LBP

Requirements can be easily complied
 Loan are released on time

- Agree to implement Management Agreement
- LBP provides satisfactory assistance
- Requirements can be easily complied
- Loan are released on time

Figure 23. SSP Borrowers' Perception on the Loan Administration by LBP

Non-Borrower Perception of SSP

Figure 24. Non-SSP Borrowers' Perception on the Loan Features of SSP

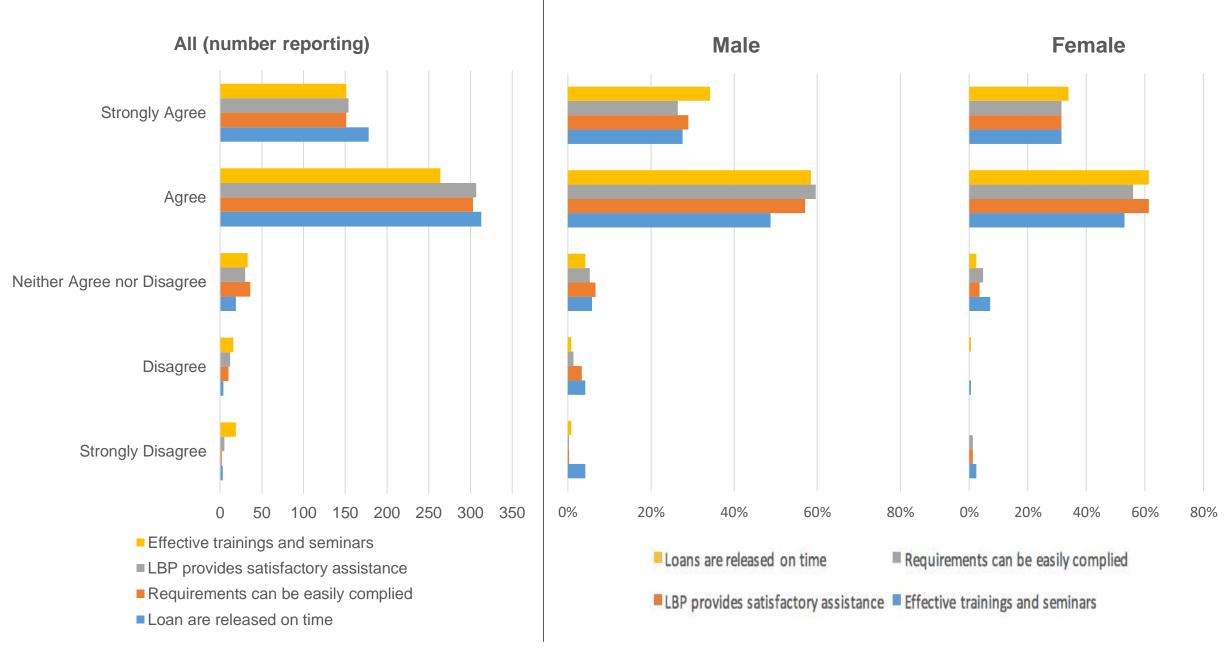

Figure 25. Non-SSP Borrowers' Perception on the Loan Administration by LBP

SUMMARY AND CONCLUSIONS

www.hotdw.com

- Extent of SSP contribution to
 - Increased productivity
 - ✓ yield of borrowers is higher;
 - ✓ around 10% of farmers shifted from inbred to hybrid with a 2t/ha yield difference
 - Increased income
 - ✓ Partial budget analysis shows higher income for borrowers due to higher yield and low interest payment
 - ✓ PSM shows impact on net income of P6,259 in DS
 - SSP participation significantly and positively affects gross farm income
 - Factors affecting SSP participation includes education (+), membership in other FO (+), household size (+), farm size (+), and tenure (-)

Improvement in access to credit

- Amount of loans granted
 - Total cumulated loan as of April 2017 P4.7 B with P1 B in Isabela and Nueva Ecija
- Number of borrowers
 - **12,157** borrowers as of April 2017 covering **23,322** ha
- Fund leveraging
 - 10% of beneficiaries shifted from inbred to hybrid
 - 15% of beneficiaries use part of loans for small business, 10% for household expenses
 - Sustained education of children, build houses
- Improved access to credit (survey results)
 - Average loan amount increased from P67,899 to P104,511 per borrower per season

Extent of absorption of play harvest by NFA/reliable buyers

 Only small % of harvest in Bukidnon (10%), Mindoro, and Bohol (less than 50%) due to price difference

ATI credit worthiness

 Strictly enforced attendance to seminar as a requirement; results to increased appreciation of farmers

Complied with lending terms

- ✓Interest rates
- ✓Eligibility criteria
- ✓ Documentary requirements
- ✓ Status of service conduits
- ✓ Repayment performance

<u>Gender dimension</u> – 35% of beneficiaries are women

- Trends shows equal risks and opportunities for men and women
- Same trend in perception on the program and the institutions involved
- No women borrowers reported to have defaulted

Successful features

- Strong participation of IAs
 - Use of concrete criteria in the selection of borrowers
 - Presence of coordinators from IAs to assist borrowers in loan application
- Cooperation of all institutions involved in the program
 - tapping of other credible buyers other than NFA, such as Bohol RPC
 - Requiring a certain % of harvest to be brought to NFA
 - expansion of collateral
 - Presence of LGUs
- Loan features
 - Low interest
 - AGFP guarantee
 - Collateral for safekeeping only

Positive perception of borrowers on all institutions involved; Neutral for NFA

Bottlenecks

- MTA implementation
- Monitoring and evaluation

RECOMMENDATIONS

- 1. Use of concrete criteria in selecting potential borrowers
- 2. Institutionalize coordinators in IA's, to be subsidized by SSP
- 3. Revisit role of NFA, strictly enforce a % of harvest to be sold to NFA or accredited buyers
- 4. Expand loan collateral
- 5. Additional staff for LBP LC specific for SSP
- 6. Institutionalize involvement of LGUs
- 7. Expand role of ATI to provide technical trainings
- 8. Incentives to IAs must be given immediately
- 9. Consider substitute IDs for difficult ones like TIN
- 10. Redefine IAs of good standing in view of free ISF
